Subject: Microsoft Settlement

"Don't go too soft on Microsoft" is my sentiment. As a Macintosh user since 1989, I have paid far higher prices for software and hardware than I otherwise would have due to the unfair and predatory dominance of the PC market by Microsoft. A normal distribution of market share, with everyone playing by the rules, did not occur, and as a consumer I have paid a high price for it because of my preference for a different operating system.
